

# Template – Test Smells Refactoring Experiment

Name:

Project:

I'm currently working on refactoring the following test smell:

My main difficulties in removing these anomalies were:

I'm using the following refactoring methods to remove test smells:

From (0 to 10), how harmful is this test smell to the system? It's because ?

What are the main challenges in maintaining the test's original behavior after refactoring the test smells?
